Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 20-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whitworth in view of Verbeeten et al..

Whitworth discloses a disk brake comprising a brake pad having a lining support (14) formed of a first material and a friction lining (16) having a lining surface, at least one stud (20) of a second material comprising a non-ferrous metal which is softer than the first material welded to the lining support for fixing the friction lining, wherein the stud passes through the friction lining up to the lining surface. However, Whitworth does not teach wherein the stud abrades with the friction lining during braking. Verbeeten et al. teach a brass stud (6) which abrades with a friction lining. It would have been obvious to one of ordinary skill in the art to provide the stud of Verbeeten et al. in order to provide wear indication. (Column 3, lines 10-17)

Re claim 24, the examiner takes official notice that MS 60 is a well known soft brass.

Art Unit: 3683

Re claim 28, Verbeeten et al. teach an underlayer (7) provided between the lining support (4) and the friction lining (2). It would have been obvious to provide an underlayer in the pad of Whitworth in order to provide noise dampening.

Response to Arguments

3. Applicant's arguments with respect to claims 20-38 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Zankl and Meyer teach similar brake pad studs.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Melanie Torres whose telephone number is (571)272-7127. The examiner can normally be reached on Monday, 6:00 AM - 4:30 PM, Tuesday, 6:00 - 12:00PM.
